

Inspections | Order Pickers | Reach Truck | Electric ITA Class II

As an Order Picker or Reach Truck operator, pre-operation inspections should be part of your daily routine. Pre-Operation inspections help not only increase the longevity of your Order Picker or Reach Truck, but also help decrease accidents due to component failure while operating it.

If you operate an Electric ITA Class II Order Picker or Reach Truck, inspect the following daily:

*Before beginning, be sure the forklift is parked on a level surface, the forks are lowered to the ground and the key switch is off.

Exterior Inspection

- No visible oil leaks
- No tire damage, cracks or wear
- No dirt, damage or cracks
- Hydraulic oil level is normal
- There is no damage, bends or looseness in the forks or backrest

On-Vehicle Inspection

- No oil leaks from the material handling system
- No dirt or damage on back mirror
- Brake pedal is effective
- All gauges operate properly
- Battery Indicator Lamp is functioning
- No steering wheel looseness
- No abnormal sound from horn
- OPS Indicator Lighting is working

Charging Inspection

- On-truck charger is functioning
- Off-truck charger is functioning
